CardioGoodFitness Customer Segmentation & Product Analysis

Understanding customer profiles, product usage patterns, and market alignment

Business Problem

CardioGoodFitness wants to understand:

- Which customer segments purchase each treadmill model
- Whether premium models are reaching the right customers
- How customer attributes (income, fitness level, and usage behavior) influence product choice

Goal

Improve product positioning, customer targeting, and marketing effectiveness.

Data Overview

- Customer demographic and behavioural dataset
- Total customers analysed: 180
- Key variables:
  - Age, Gender, Marital Status, Education Level
  - Income, Fitness Level, Weekly Usage, Weekly Miles
- Products analysed:
  - TM195
  - TM498
  - TM798
- The dataset was cleaned, validated, and analysed using Python (EDA) and Power BI.

Key Insight 1
Customer Segmentation

- **Customer Segmentation by Product Type**
  - **TM195 (Entry-Level Model)**
    - Lower-to-mid income customers
    - Moderate fitness levels
    - Lower weekly usage and miles
    - More casual or beginner users

  - **TM498 (Mid-Range Model)**
    - Similar income and fitness profile to TM195
    - Slightly higher weekly miles
    - No strong differentiation from TM195

Key Insight 1
Customer Segmentation

- **TM798 (Premium Model)**
  - Significantly higher income
  - Highest fitness levels
  - Highest weekly usage and miles

TM195 and TM498 show overlapping customer profiles, while TM798 clearly stands out.

Key Insight 2: Premium Product Alignment Premium Model Market Fit (TM798)

- Customers purchasing **TM798**:
- Earn substantially higher income
- Exercise more frequently
- Have higher self-reported fitness levels
- Accumulate significantly more weekly miles
- **TM798 is strongly aligned with high-income, fitness-focused customers**, indicating effective premium positioning.

Dashboard Snapshot
Interactive Dashboard Overview

- KPI cards summarizing customers
- Slicers for gender, product, marital status
- Visual comparison of income, fitness, and usage

Recommendations

- **Maintain premium positioning** for TM798 and continue targeting high-income, high-fitness customers
- **Reassess TM195 vs TM498 differentiation**, as customer profiles largely overlap
- Consider:
  - Clearer feature or pricing distinction between TM195 and TM498
  - Marketing refinement to reduce internal product competition
- Use customer fitness and usage behavior as key targeting criteria in campaigns

Conclusion

- The analysis confirms strong premium market alignment for TM798 and highlights overlapping customer profiles between TM195 and TM498.

- Leveraging these insights can improve product positioning, targeting precision, and overall marketing strategy.
